Hello Chris,

A quick update on site activities for you.

Activity over the past week has been limited to loading out the stockpiled soil. As of Monday, about 2/3 of the stockpile was removed which opened up two grids for collection of samples. Those sample results are expected back later this week. Hopefully by that time we will be prepared to collect the final two grid samples from beneath the stockpile location and take any required corrective actions related to the results of the samples already submitted. If all goes well, field activities could be wrapped up by the end of next week.

We will keep you posted of any changes. Please let me know if you have any questions.

Thanks,

Mike Stephenson
